## Optional Integrated Handrail

- + Enhanced patient safety without affecting measurement
- + Extra support and stability during the weighing process
- + Enables a firm stance for patients in need of assistance

Dimensions (WxHxD) 16.9 x 44.2 x 12.2 inch /  
42.9 x 112.2 x 30.9 cm

Weight 8.8 lbs / 4.0 kg

## Optional handrail for increased patient stability

To accommodate patients in need of extra support during the weighing process, the seca 777 is equipped with the option to add an integrated handrail (seca 477). The easy-to-mount handrail raises the level of patient security to a new level. The measuring rod is securely attached to the column and provides a wide measuring range that is suitable for pediatrics to tall individuals. In addition, we've added extra space between the column and the platform to ensure the highest comfort.

## Cost-effective without any compromises in quality

The seca 777 puts unstable and inaccurate weighing and measuring to an end. It boasts a tilt-proof full metal platform and a stable single piece column. The eye-level display and ultra sturdy base provide comfort and security. It is a quality every patient will notice, as soon they sets foot on the platform. The scale is easy to move by staff due to the large rubber coated castors and a wide wheelbase.
